Collectstor

May 2013 – Present

Founder and Full Stack Engineer

Tokyo, Japan and Perth, Australia

- Founded Collectstor – a website where collectors can showcase and share their collections
- Coded the main website which includes user registration, profile information; news feed and upload feature using a LAMP stack using CakePHP as a framework.
- Honed entrepreneurial skills by marketing the idea at events and to shops throughout Perth and the US. This included distributing advertising material such as pamphlets to various shops in Perth and the US.
- Created iOS App in Swift, which handles user registration, login and an image upload feature. Implemented a web-based RESTful API to handle app interaction with the website.

Australian Embassy, Tokyo

July 2008 – April 2013

Electronic Media Administrator

Tokyo, Japan and Perth, Australia

- Developed several in-house CMS. The first is an event management and booking CMS, the second is an invitation, RSVP, and check in system for the Embassy's biggest yearly event. Both of these were created using a LAMP stack and CakePHP.
- Managed requirements and projects for the Embassy and other Government agencies within the Embassy.
- Successfully internationalised and updated all Embassy and attached agencies' websites to W3C and HTML5 compliant, also converting all pages from static to dynamic (LAMP stack) and fully responsive. Other duties included Linux server maintenance and official photographer.

IT Vision

October 2006 – March 2007

Web and Software Engineer

Perth, Australia

- Successful integration of the RRIF web component using HTML, XSL and C# into their in-house CRM system. Their CRM system uses IBM UniVerse and Java.
- Gave a web developer's perspective to the RRIF (the company's CRM) project, which helped improve the fluency of the project timeline.

HomeTrader

March 2006 – October 2006

Web Developer and Project Manager

Perth, Australia

- Managed and coded web related content and new development projects, as well as an intranet system for web development projects in ASP.NET and MS SQL Server.
- Created newsletter campaigns for marketing purposes.

Itomic

January 2005 – February 2006

Full Stack Web Engineer

Perth, Australia

- Worked on the website lifecycle which includes the clients' needs analysis, design, implementation and timely deployment of the project. This included being the project manager or team lead on several projects.
- Occasionally maintained LAMP server.
- Worked individually or in teams to successfully complete website projects done in PHP, MySQL and Javascript within specified deadlines.
- Coded and implemented the first customisable online shopping cart in PHP for the company.

Omegatrend International

December 2004

HTML and Javascript Programmer (Contract Position)

Perth, Australia

- Coded HTML and Javascript pages used for their Rapid Global Expansion Program into Hong Kong, the Philippines, the USA, the UK, South Africa and Brunei.

Precise IT Solutions

January 2002 – January 2005

Web Developer, Program Analyst

Perth, Australia

- Analyzed, designed, and implemented websites for clients in PHP and ASP, based on extensive research of customer needs and specifications. Managed end-to-end server setup, deployment and support for these sites.
- Proposed and led an effort to create a successful online shop, effectively transitioning the company from IT solutions-only to a complete e-business firm.

Speedworks Motorsports

January 1999 – January 2002

Database Administrator, Sales Rep and Pit Crew

Perth, Australia

- Successfully created, implemented and maintained a stock and products database.
